

IR Project Proposal

Team Members:

- Hamza Majeed – 20L-2074
- Haiqa Abdul Rauf – 20L-0909
- Rana Tayyab Hassan – 20L-1097

Project Topic:

“Constructing a Pandemic Information Retrieval System”

Problem Background:

“The ongoing global health crises underscore the critical need for efficient access to accurate and timely pandemic-related information. This project proposes the development of an advanced Information Retrieval (IR) system designed to enhance the accessibility and retrieval efficiency of pandemic data.”

Objective:

To Develop an information retrieval system for the efficient retrieval of pandemic-related data.

Methodology:

- Research on relevant systems and researches
- Data Collection
- Preprocessing
- System Development
- Evaluation
